Radiation/TENORM Safety and Health Awareness Training

Asia Lab (Malaysia) Sdn Bhd

i. Background

In Malaysia, more than 5,000 companies (including clinics, medical centres, etc) are dealing with radiological equipments and radiation sources. The employees who work with, or are exposed to these equipments are subject to radioactive exposure or contamination risks that are very dangerous to their health. Radiation exposure can lead to a number of long term illnesses such as leukemia and cancer. Excessive exposure would certainly kill a person.

ii. Introducing Asia Lab

Asia Lab was incorporated in 1985 in Kuala Lumpur. It is the leading company in Malaysia which provides comprehensive radiation safety training, inspection and consultancy services. Asia Lab is the first company in Malaysia to have dual accreditations from Atomic Energy Licensing Board and Ministry of Health. The dual accreditations allow Asia Lab to serve both the medical and the non-medical industries. Currently, Asia Lab serves more than 200 companies which include Mitsubishi, Samsung, Hitachi, KPJ Group, Gleneagles Medical Centre, Malayan Cement, IJN, SHELL, PETRONAS, ExxonMobil, and many others.

iii. Asia Lab Services that are applicable to AELB License Holders

Asia Lab offers a number of services which assists AELB license holders to comply with AELB licensing requirements. These include:

1. TENORM Safety & Health Awareness Programmes and RPO Refresher Training
2. Radiation Leak Test
3. Radiation Protection Consultancy (RPC Service)
4. TENORM Survey
5. Radiological Laboratory services

TENORM Safety & Health Awareness and RPO Refresher Training

The exposure to radiation sources (TENORM, gauging) and irradiating appliances in various industries are increasing due to rapid development. Awareness Training among workers handling or those exposed to ionization radiation could prevent or control radiation hazards. Asia Lab (Malaysia) Sdn Bhd is a licensed training and consultancy agency approved by the Atomic Energy Licensing Board (AELB), Malaysia. We conduct training and consultancy services for the sectors involved with radiation sources and irradiating appliances.

The training provides the guide and understanding of the principles of radiation protection; application of As-Low-As-Reasonably-Achievable (ALARA) concept, safety and emergency procedures.

At the end of the training, the participation will:

- Understand the best practices of protection from radiation risks and accidents.
- Have detailed knowledge and understanding of ionizing radiation and their hazards and risks to our health.
- Understand the legal requirement under Act 304.

Who Should Attend:

- Company RPOs
- Radiation Workers
- AELB License Holder (OBTL)
- Personnel dealing with Radiation Equipment/radioactive material/TENORM
- Radiographers and Researches
- HSE Personnel
- Any employee/staff interested in Radiation Protection and Safety Awareness

Asia Lab with the support of AELB personnel will be conducting the following training programmes from January – December 2011. All participants will receive Attendance Certificates which are approved and recognized by AELB.
